About Me

I am a dynamic Full Stack Developer with expertise in Python, Django, React, and the MERN stack. Proficient in JavaScript, Node.js, Express, MongoDB, PostgreSQL, and REST APIs, I specialize in crafting scalable, high-performance web applications. With a keen eye for UI/UX design, database optimization, and API integration, I thrive on solving complex challenges and delivering seamless digital experiences. Passionate about clean code, problem-solving, and continuous learning, I am always exploring new technologies to stay ahead in the ever-evolving tech landscape.

Experience

One Team Solutions, Kochi, India | Python Full-Stack Django with React Kerala, Ernakulam | May 2024 - November 2024

Successfully completed a 6-month internship at OneTeam Solutions as a Python Full Stack Developer, gaining hands-on experience in Django, React, development. Worked on real-world projects, enhancing skills in backend and frontend development, API integration, and database management.

Projects / Open-Source

Veg Store | Link

Python ,Django, HTML, CSS , Javascript, SCSS

As a Full-Stack Developer, I developed an online platform designed to streamline the sale of vegetables. The project involved creating a user-friendly and responsive interface that allows users to browse, search, and filter through product listings effortlessly. I implemented an order management system, enabling users to place, track, and manage their orders seamlessly.

Aspira | Link

Python ,Django, REST API, HTML, CSS , Javascript, SCSS

Aspira is a revolutionary job alert and search platform designed to make finding jobs faster and more accessible for everyone, especially for individuals seeking opportunities from the comfort of their homes. Aspira caters to all types of job categories, ensuring inclusivity and relevance for a diverse audience. With its real-time job alert system, users receive instant notifications about new job openings tailored to their preferences. The platform simplifies the job application process, enabling users to connect with employers quickly and efficiently.

OnlineMOV | Link

Nodejs, Express, MongoDB, HBS, CSS, Styl,

OnlineMOV is a MERN stack-based movie listing and streaming platform. Users can browse movies, view detailed movie pages, and stream content seamlessly. Built with MongoDB, Express.js, React, and Node.js, the project integrates the TMDB API for real-time movie data.

NoteAPP | Link

Python ,Django, React, REST API, HTML, CSS , Javascript, SCSS

NoteAPP is a task management application built with Django and React. Users can create, save, and delete tasks efficiently. It features a clean UI, real-time updates, and task sorting by date for better organization. The backend is powered by Django REST Framework, while React handles the dynamic frontend.

Skills

Programming Languages:	Python
Libraries/Frameworks:	Django, Express, Javascript, CSS, HTML, React, Bootstrap, Express, NodeJS
Tools / Platforms:	Git and Vs code, pycharm
Databases:	Mysql, postgresql, MongoDB

Education

SNCollageKollam,India,
BSCPhysicsandComputerApplication

Kerala,Kollam
July2021-June2024

Certifications

Python Full-Stack Django with React - One Team Solutions, Kochi, India
Build a PC And Network - IT Park Pathanapuram 2019
